MIHIR THAKKER

Technical Delivery | Customer Onboarding | Infrastructure Change | Project Management | Reading/London, United Kingdom

Email: mihirt132@gmail.com | LinkedIn

PROFILE

Senior Operations Engineer and team lead at a technology consultancy, with about two years eight months as project manager in practice across infrastructure upgrades, migrations and customer onboarding. Plans technical change from scoping to cutover and hands it over into live support, working with engineers, vendors and customer technical leads. Supports customers in financial services, insurance and healthcare standards. Experienced in AWS, Azure and Linux environments, ITIL-aligned service management and Jira-based delivery governance.

SKILLS

- **Delivery and governance:** project planning, phased delivery, change control, risk and dependency management, Go/No-Go decisions, cutover and UAT coordination, status reporting, effort estimation and proposals, Agile (Scrum Master since 2025)
- **Customer engagement:** discovery workshops, requirements gathering, onboarding, knowledge transfer, service reviews, stakeholder communication
- **Service transition:** service handover, runbooks and SOPs, SLA framework, incident, problem and change management, ITIL 4
- **Infrastructure and security:** AWS (EC2, RDS, CloudWatch), Azure (virtual machines, AD single sign-on and MFA), Linux, networking (VPN, TLS), vulnerability response, role-based access control
- **Platforms and tools:** Jira, Confluence, Jira Service Management, Tempo, monday.com, Zapier, Snowflake, Claude, Microsoft Copilot

PROFESSIONAL EXPERIENCE

Automation Consultants

Senior Operations Engineer 09/2024 – present

- Leads the upgrade of about 80 production Linux servers for a healthcare-standards customer: risk-sequenced Dev, UAT and Production plan, weekly status reports, change control and maintenance-window scheduling.
- Owned the second phase of a Confluence merger into a customer's Data Center (December 2024 to March 2025), covering Go/No-Go decisions, out-of-hours cutover and UAT coordination.

- Led the handover of a monday.com, Snowflake and Zapier integration from the consultancy team, then consolidated its flows into one application-creation flow to fix applications intermittently failing to be created.
- Ran discovery for an Agile and ITSM assessment across six delivery squads with three client stakeholders, producing prioritised recommendations and a follow-on role-based access control project.
- Onboarded two customers into managed support in 2025, leading scope, access and work-plan calls for one and knowledge-transfer sessions for the other.
- Leads Team Atlas (two people, eight customers) and its sprints; wrote SOPs and trained engineers as first-response SLA attainment rose from 17.8% in 2023 to 73.0% in 2026.

Automation Consultants

Technical Operations Engineer **09/2023 – 09/2024**

- Project manager on a Jira merger into a customer's Data Center, redesigning a production window too short for rollback into two windows with dry runs; zero recorded rollbacks.
- Project manager on a legacy bug-tracking migration to Jira, building estimates with the engineers and agreeing deadlines with the customer.
- Led my sub-team from October 2023, began line management, and supervised a colleague as project lead on a Cloud-to-Data-Center migration.

Automation Consultants

Operations Engineer / Graduate Operations Engineer **09/2021 – 09/2023**

- Ran an out-of-hours Jira upgrade in which an Azure guest-agent outage and an MFA lockout hit together, resolving both the same night with the customer's operations manager.
- Scheduled a mandatory AWS RDS patch ahead of AWS's deadline using Multi-AZ failover, with effectively zero production downtime.
- Completed Jira and Confluence upgrades for four customers between 2022 and 2023, and wrote Managed Services knowledge base pages (253 Confluence pages authored by 2026).

EDUCATION

BSc Computing and Management | Loughborough University **09/2017 – 07/2021**

- **Final Grade:** 2:1
